

Google Workspace Deployment & Security Implementation (Live Environment)

Employee Offboarding Procedure

Purpose:

To securely deprovision user access and protect organizational data when an employee leaves the organization.

Step 1 — Receive Offboarding Request

- Receive notification from HR or management
 - Confirm employee name, role, and termination date
-

Step 2 — Locate User Account

- Navigate to Admin Console → Directory → Users
 - Search for the user account
-

Step 3 — Suspend User Account

- Select the user
 - Click “Suspend user”
 - Confirm suspension
-

Step 4 — Review Group Memberships

- Identify all groups the user belongs to
 - Document memberships if needed
-

Step 5 — Remove Access to Groups and Resources

- Remove user from:
 - Google Groups
 - Shared Drives
 - Shared resources
-

Step 6 — Preserve Business Data

- Review files owned by the user in Google Drive
 - Ensure business-critical files remain accessible
-

Step 7 — Transfer Ownership (If Needed)

- Transfer ownership of files to:
 - Manager
 - IT account
 - Verify access continuity
-

Step 8 — Verify Access Removal

- Confirm user no longer has access to:
 - Email
 - Drive
 - Shared resources
-

Step 9 — Document Completion

- Record offboarding completion
- Note any exceptions or issues
